SUBJECT: Request for DepEd Advisory on the Conduct of the 2025 INTERNATIONAL RESEARCH COLLOQUIUM AND RESEARCH PUBLICATION (2025 IRCARP)

TOLENTINO G. AQUINO
Regional Director
DepEd Region 1

Dear Dr. Aquino:

Warm greetings from the Aloysian Professional Community!

We are writing to formally request the issuance of a DepEd Advisory to facilitate the dissemination of information regarding the forthcoming **2025 International Research Colloquium and Research Publication (2025 IRCARP)** with the theme, *"Innovation and Sustainability: Bridging the Gaps Through Interdisciplinary Research"*.

This research exposition and publication serve as a catalyst for researchers hailing from diverse fields to converge and explore innovative solutions, thus addressing pressing global challenges while championing sustainability. It extends a broad canvas of research topics, promoting interdisciplinary collaboration among scholars.

Organized by Aloysian Publications (Philippines) in collaboration with BETMA English (Vietnam), this noteworthy event is scheduled for April 25-27 2025, encompassing Friday Saturday to Sunday. The venue is the Biology Auditorium of UP BIOLOGY Institute of Biology, College of Science, University of the Philippines Diliman, Diliman Quezon City. We extend the invitation to all advocates of the Aloysian Professional Community, both members and non-members alike.

Rationale:

The rationale for hosting a Research Colloquium and Research Bulletin with the theme "Innovation and Sustainability: Bridging the Gaps Through Interdisciplinary Research" is rooted in the urgent need to address complex global challenges. These challenges, which encompass environmental, social, economic, and technological issues, require innovative and sustainable solutions that transcend disciplinary boundaries. Here's why this event and bulletin are essential:

- 1. Complexity of Global Issues:** Modern global issues, such as climate change, resource depletion, inequality, and health crises, are multifaceted and interconnected. Traditional, single-discipline approaches often fall short of providing holistic solutions.
- 2. Interdisciplinary Collaboration:** Interdisciplinary research encourages collaboration among experts from diverse fields, fostering a synergy that leads to more comprehensive and effective problem-solving.
- 3. Innovation and Sustainability:** The fusion of innovation and sustainability is crucial for addressing contemporary challenges. Innovation drives the development of new technologies and methodologies, while sustainability ensures that solutions are viable in the long term.

REC 2504583

4. Knowledge Integration: By bringing together researchers from various disciplines, we can integrate knowledge, theories, and methodologies to develop a deeper understanding of complex issues.

5. Knowledge Dissemination: The research bulletin complements the colloquium by providing a platform for researchers to share their findings, promoting the dissemination of innovative and sustainable ideas to a broader audience.

Objectives:

The Research Colloquium and Research Bulletin with the theme "Innovation and Sustainability: Bridging the Gaps Through Interdisciplinary Research" aim to achieve the following objectives:

1. Facilitate Interdisciplinary Exchange: Encourage researchers from diverse fields, including natural sciences, social sciences, engineering, humanities, and business, to exchange ideas and collaborate on innovative, cross-disciplinary projects.

2. Promote Innovative Solutions: Provide a platform for the presentation and discussion of research that highlights innovative approaches to global challenges, particularly those related to sustainability.

3. Foster Sustainable Practices: Showcase research that not only addresses immediate issues but also emphasizes the long-term sustainability of proposed solutions, taking into account environmental, economic, and societal impacts.

4. Encourage Knowledge Sharing: Through the research bulletin, enable researchers to disseminate their findings to a wider audience, including policymakers, educators, and the general public, fostering a greater understanding of the importance of interdisciplinary research in addressing pressing global issues.

5. Inspire Future Collaborations: Create an environment that sparks new collaborations and partnerships among researchers, institutions, and organizations interested in tackling complex global challenges.

6. Advance Academic Discourse: Contribute to the academic discourse by fostering a culture of knowledge sharing and critical analysis, ultimately enhancing the quality of research in the fields of innovation and sustainability.

By organizing this research colloquium and research bulletin, we aim to harness the collective intelligence and creativity of the research community to make significant strides in addressing the world's most pressing challenges while promoting sustainable and innovative practices.
