PROGRAM MATRIX

3-Day National Seminar-Workshop on Future-Ready Digital Skills: Computer Literacy, Artificial Intelligence, and Technology-Enhanced Learning

Description: This three-day national seminar-workshop is designed to equip professional teachers with future-ready digital competencies by integrating computer literacy, artificial intelligence (AI), and technology-enhanced learning into a comprehensive professional development program. As education rapidly evolves in response to digital transformation, educators are expected to possess not only foundational computer skills but also the ability to effectively utilize emerging technologies that promote innovative, engaging, and learner-centered instruction.

The program provides participants with a progressive learning experience that begins with essential computer operations and digital productivity skills, advances to the practical applications of Artificial Intelligence in education and workplace settings, and culminates in the integration of technology-enhanced teaching strategies and digital instructional design. Through interactive lectures, guided demonstrations, hands-on workshops, collaborative learning activities, and authentic performance tasks, participants will gain practical experience in utilizing productivity software, AI-powered educational tools, digital collaboration platforms, online assessment applications, and interactive learning technologies.

Participants will also examine ethical considerations surrounding artificial intelligence, responsible digital citizenship, cybersecurity awareness, data privacy, and the appropriate use of technology in educational environments. The seminar-workshop emphasizes the development of technology-enhanced instructional materials, AI-assisted lesson planning, and innovative classroom practices aligned with the Philippine Professional Standards for Teachers (PPST), 21st Century Skills Framework, Digital Competence Frameworks, and current educational trends.

Upon completion of the program, participants are expected to demonstrate improved digital proficiency, confidently integrate AI and educational technologies into teaching and learning processes, and design innovative, inclusive, and technology-supported learning experiences that promote student engagement, creativity, collaboration, critical thinking, and lifelong learning.

This program is implemented by the Philippine Organization for TLE and TVL Educators Inc. (POTTE), in partnership with the Philippine Continuing Professional Development Training Center, Inc. (PCPD), as part of its continuing commitment to
